ARE YOUR SPOUSE'S BOOT-KNOCKING EPISODES G-RATED EXTRAVAGANZAS?

DONALD FAISON HAS A SCRIPT TO UNLEASH HER INHIBITIONS

➤ Despite your raging horniness, your ball-and-chain's sexual drive has come to a screeching halt. On the brink of locating the nearest cathouse, you've reached total desperation.

Fear not: NBC's *Scrubs* star Donald Faison has mastered the art of schooling clueless men (see SpikeTV's *Playbook*). Above all, Donald's key to upgrading your closed-door sessions is, "Pay attention to your lady." If you were doing that, though, you wouldn't need our help, would you, Don Juan? Allow Dr. Faison to issue effective bedroom-boom prescriptions. —JERRY BARROW

SLEEPING BEAUTY

It's 1 a.m., and the Knicks just posted another L. You need sexual healing, but your bedfellow is counting sheep. Before flipping to Skinemax, send your fingers up her remote. "Start with a massage," he says. "Nobody wants to be woken up out of sleep. Get your cuddle on—don't just throw the legs open."

◀ WHIP APPEAL

Once your boo shows signs of heating back up, test her waters. Hit her with potential role-playing scenarios to see just how adventurous her newfound kinkiness truly is. "In role-playing, go as far as you can," says Faison. But try to refrain from S&M-styled improv. "When you're poundin' it, it's cool to smack the ass, but not when you're being gentle. Don't go 'Baby, darling,' whap!"

BETWEEN THE SHEETS ➤

Before casting your partner-in-crush as the Naughty Librarian in your own role-playing game, try actually reading a book first. "If you're doing your job, romance novels are not necessary, but it's good to read books about the body. Surprise her with *The Joy of Sex*, or Kim Catrall's *Satisfaction: The Art of the Female Orgasm*, which describes the G-spot and all that. Some people still think the clitoris is the G-Spot." Ignorance isn't always bliss.

◀ TRIPLE PLAY

Good news: Your typically tame lover is game for a triz. Before you post online for "Nympho Midget with No Gag Reflex," though, breathe easy. "Scout together," says Faison. "Go to clubs: If you're both feeling someone, approach." Once you have your playmate down, try to keep it up. "If you end early, be prepared to sit and watch. Once you're done, the girls will keep going without you."

GOOD VIBRATIONS

Keep it simple—packing excessive props might make your boo question your skills. "Let her bring the toys," Faison cautions. "If you pull out a toy and she freaks out, you've not only destroyed your love life, but she's also going to think you're a freak who walks around with a pocket pussy."
